

# UPRIGHT PIANOS

YAMAHA

Tradition and Technology Passed Down through the Generations

Founded in 1887, Yamaha has become a world leader in high-quality, inspirational musical instruments. We crafted our first piano in 1900. Since then, our uprights and grands have captivated players and audiences alike, combining exquisite natural response with truly wonderful sound.

Yamaha's longevity owes much to our constant refinement of technologies used to build high-quality pianos. But there's more to it than that. We also nurture a culture in which expert know-how is passed down from

one generation to the next. No machine can replicate all the processes of building a piano. From wood selection and woodworking to regulation and voicing, every step has evolved over time in the pursuit of perfection. You can see it—and hear it—in every piano we make.

Our progress is driven by the twin engines of constant innovation and cherished tradition. Today, Yamaha is more committed than ever to the design and production of beautiful pianos with rich acoustic tone, unmistakable feel, and timeless beauty.

# YUS series

Premium quality with an elegant, striking design—the YUS Series brings high-end refinements and performance to a surprisingly affordable level.

The YUS Series features a unique cabinet design that offers superb acoustics, with resonance and projection far more like a grand piano than a traditional upright. The sound is further enhanced by the use of premium grand piano hammers that are finely adjusted by our master craftsmen to ensure optimal tone, volume, and tonal balance across the full range of the instrument.

These three models are available in a variety of beautiful finishes.

# U series

The U Series is considered an educational and institutional benchmark worldwide. A U Series piano makes for an excellent student instrument, whether in the home or in an educational institution. These pianos feature an expansive soundboard that creates a rich, resonant voice with an evenly balanced timbre across the full range of the keyboard. Specially designed hammers for each model ensure exceptional tone production and long-term durability, making them ideal for extensive use.

Two model variations are available in a variety of finishes.

# JU/JX series

Designed to offer Yamaha quality at the most affordable level, JU/JX Series pianos draw on everything we have learned from over 100 years of piano production to deliver a dependable instrument that's ideal for the beginning pianist.

With a compact, robust design and no compromises on materials or craftsmanship, the JU/JX Series offers Yamaha's renowned pure, clear tone and an easy-to-play, responsive keyboard that inspires players of all levels.

The JU/JX Series is also available in a SILENT Piano configuration, allowing practice with headphones.

# M series

M Series upright pianos remain faithful to Yamaha's tradition of superb sound and high quality, and also serve as elegant items of furniture that will enhance any room.

The M3 pianos bring rich sound and a pleasure-filled invitation to play, while the M2 brings both acoustic and aesthetic appeal at an attractive price.

# Expanding the Possibilities of the Piano

At Yamaha, our unique approach combines time-honoured traditional craftsmanship with the very latest technological innovations. We create pianos that inspire and truly enhance the playing experience, whether you're learning, practising, performing, or playing for pleasure.

Thanks to their superior construction and empowering innovation, Yamaha pianos are popular in schools, concert halls, studios, music academies, and of course homes, where they provide the perfect centrepiece to your musical life.

## disklavier **ENSPIRE**

### The World's Most Advanced Piano

A piano with unlimited potential and the pinnacle of performance reproduction technologies, the Disklavier ENSPIRE is the perfect experiential platform for any environment.

At the heart of every Disklavier is a beautifully crafted Yamaha acoustic piano. Whether you're playing or enjoying the playback of a recorded piece, you can

delight in the presence and resonance of a superb-sounding acoustic piano. The Disklavier ENSPIRE truly captures and illustrates the beauty of performance. With just one tap, the keys and pedals of the Disklavier come to life with effortless motion, recreating a precise portrayal of the artist's intentions.

# Always in tune with you

With all the allure of an acoustic piano in a form that you can play without worrying about the time of day or those around you, these instruments will soon become an integral part of your musical life.

## TransAcoustic™

### Full acoustic sound for all occasions

TransAcoustic™ Piano—a innovative proposal from Yamaha for new ways to enjoy the acoustic piano. Newly developed TransAcoustic™ technology transmits digital sound directly to the piano soundboard, making the piano itself behave as a beautifully reverberating loudspeaker. TransAcoustic™ technology makes it

possible to control volume without losing the rich sound only an acoustic piano can provide. Enjoy authentic acoustic sound any time you wish by adjusting the volume to suit the time of day, the surroundings and the preferences of player and people around them.

Since the area of contact between the transducer and the soundboard is limited, there is no adverse effect on resonance of the soundboard.

### TA2 type control panel

The control panel has been given a sophisticated design that unobtrusively blends with the piano itself. Moreover, the simple controllers allow you to operate the instrument easily.

## SILENT Piano™

### Immerse yourself in the natural sound of the piano

SILENT Piano™ gives you authentic acoustic piano performance, even when you play with headphones. When you activate the SILENT Piano™ function, the hammers don't hit the strings. Instead, sophisticated sensors capture the keys' movements and send performance information to a digital tone generator. The

sound you then hear in your headphones is based on high-quality binaural samples taken from the flagship Yamaha CFX. With a SILENT Piano™, you enjoy a rich and natural playing experience day or night—without being disturbed or disturbing others.

### SH2 type control panel

Available models: YUS series, U series

### SC2 type control panel

Available models: U1J, JX113, JU109, M series
